## JetMail® Digital Mailing System Provides a Speed and Flexibility That Points Office Productivity in the Right Direction

**T**oday every business is faced with trying to do more with less. And time is always money. So the last thing a business needs to be concerned with is time-consuming mail processing. With FP's JetMail, you don't have to. It is the only business-class postage meter on the market today that processes virtually any type of mail up to nearly one inch thick and any height in just one pass. You can place all the same class mail pieces in the feeder and JetMail does the rest. You don't even have to sort them. What could be more convenient?

JetMail's flexibility is due to an exclusive vertical transport designed to handle catalogs and other bulky mailings with ease. Offering the widest pass-through in the industry, oversized mail and #10 envelopes are processed with the same efficiency. **A**nd JetMail is ready to grow along with your business. Add an optional inline dynamic scale to weigh and calculate the correct postage or card system for tracking up to 300 accounts for internal accounting. Whatever your postage needs may be, JetMail is ready to meet them.

# JetMail

## Key Advantages

**JetMail's Exclusive Vertical Feeder Handles All Your Mail** Perfect for large and bulky mailings up to nearly one inch thick and any height, JetMail offers the widest pass-through in the industry.

**Perfect Sealing at the Touch of a Button** Seal and process all in one step. It's that easy.

**Feed Unsorted Mail with an Optional Inline Dynamic Scale** Inline dynamic weighing feeds unsorted mail through the system calculating the right rate every time. Eliminates the two-step weighing and postage calculation process saving time and increasing mailroom productivity.

**Use the Automatic Label Dispenser for Large Packages** Pressure sensitive labels for large packages eliminates messy water-activated processes.

**Weigh and Rate Your Mail with Ease** Integrated scale calculates postage rates for larger pieces.
