3 2 5 Labeling Machine

TECHNOLOGICALLY ADVANCED

Process mail pieces ranging in size from 3 1/4" x 2 3/4" up to 14" x 10" — and thicknesses up to 1/8 inch — with the 325 Labeler.

Adjustable speeds up to 10,000 labels per hour helps save time and labor costs. The 325 accepts standard one-up labels ranging in widths from 1 1/4" to 6 3/8" and heights from 3/4 inch up. A two-position electronic switch allows you to adjust sensitivity for various label thicknesses. For added convenience, the 325 assists in presorting with the simple removal of one label between zip codes; labeler pauses as each new zip code is reached.

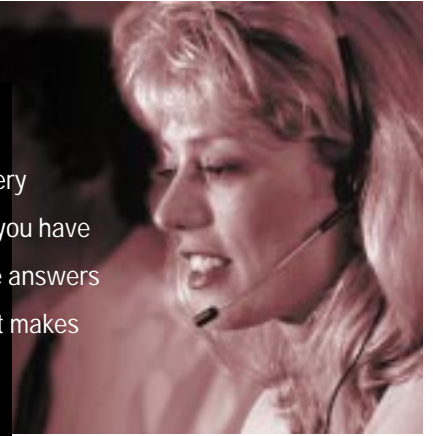

Other helpful features include: an electronic counter that displays total number of pieces labeled, adjustable mail catcher that comfortably accommodates pieces as they're ejected from the machine, and an automatic stop function that's activated when machine runs out of mailing pieces or labels, or in case of a misfeed. Optional CS Conveyor/Stacker is available.
